PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building scalable web applications from concept to production. Formally trained at Pluracode Academy in HTML, CSS, JavaScript, Bootstrap, GitHub, React, Node.js/Express, Postman, and MongoDB. Specializes in React 19, JavaScript, TypeScript, and Node.js, with a strong frontend focus and solid backend capabilities. Proven track record delivering B2B platforms, SaaS products, and corporate systems for clients in maritime, energy, and education sectors.. Comfortable working within cross-functional teams, navigating complex API integrations, and maintaining production-grade deployments on Vercel and Render.

CORE SKILLS

Frontend	React 19, JavaScript, TypeScript, Vite, Tailwind CSS, Bootstrap, Zustand, React Query (TanStack Query)
Backend	Node.js, Express.js, MongoDB, JWT Authentication, REST APIs, Cloudinary
Tooling	Git, GitHub, Postman, Vercel, Render, Vs code, Claude API, npm / yarn
Practices	Component-driven architecture, mock-first development, API integration, responsive design
Languages	JavaScript (ES2022+), TypeScript, HTML5, CSS3

WORK EXPERIENCE

Frontend & Full-Stack Developer (Contract)

Aaronic E-Commerce Platform | Canada-based | 2024 – Present | Remote

- Led frontend development of the buyer-facing storefront (React 19, TypeScript, Bootstrap), covering protected routes, profile pages, password reset flow, and quote form fixes.
- Led frontend development of the B2B seller dashboard built with React 19, TypeScript, Vite, and Tailwind CSS, targeting maritime and industrial sellers.
- Architected multi-step registration flows, product management modules, and service listing features with Zustand state management and React Query data fetching.
- Transitioned to full-stack development on the backend repository, building real MongoDB aggregations for the dashboard, a full Services module, notifications system, seller storefront endpoint, avatar upload, and quote request scoping.
- Navigated complex backend integration challenges including CORS configuration, cookie-based authentication (withCredentials), and distinguishing live vs. pending API endpoints.
- Implemented mock authentication layers to unblock frontend delivery during backend unavailability; maintained backend-ready structure throughout.

- Collaborated with a distributed team, managing Git workflows including feature branches, force pushes, backup branches, and Vercel deployment pipelines.

Full-Stack Developer

Invade Tech Solutions | 2026 | Remote

- Built a full SaaS educational platform end-to-end... React frontend (Vercel), Node.js/Express/MongoDB backend (Render), serving dual admin and student portals.
- Implemented JWT-based authentication, Resend email integration, Cloudinary file uploads, and multi-subdomain DNS configuration on TrueHost.
- Developed an AI-powered Tech Buzz news aggregation system using the Claude API, processing RSS feeds and persisting stories in MongoDB.
- Designed and delivered student portal UI based on Figma designs; assessed and addressed infrastructure scalability concerns on Render free tier.
- Engineered a complete webinar and live video system integrating Daily.co for cloud recording and real-time video calls, enabling instructors to broadcast and students to join webinars seamlessly.
- Built recording management infrastructure with backend APIs to fetch, sync, and store recording metadata from Daily.co, implementing a dedicated recording player page with TanStack Query for efficient data fetching and caching.
- Implemented state management using Zustand and TanStack Query across the platform, creating custom hooks for API integration and optimizing component rendering performance.
- Developed role-based access control with student authentication middleware, ensuring secure access to recorded webinars and class materials across multiple user portals.

Frontend Developer (Contract)

Eagle International Group | 2026 | Remote

- Delivered a full corporate website (6 pages) for an international trade company operating in Oil & Gas, Renewable Energy, Civil Engineering, and Supply Chain.
- Stack: React, Vite, TypeScript, Tailwind CSS, Zustand, TanStack Query... dark theme with burnt orange accent system.
- Completed 40+ file architecture, custom hooks, data fetching layer, and resolved TypeScript / path alias issues for clean Vercel deployment.

KEY PROJECTS

Aaronic Seller Dashboard: [React 19](#) · [TypeScript](#) · [Vite](#) · [Tailwind](#) · [Zustand](#) · [React Query](#)

- B2B marketplace platform for maritime and industrial sellers. Features multi-step onboarding, product and service management, and real-time backend API integration with a deployed Vercel backend.

Invade Tech Solutions Platform: [React](#) · [Node.js](#) · [Express](#) · [MongoDB](#) · [JWT](#) · [Claude API](#)

- Full SaaS education platform with AI-powered news aggregation, dual-portal authentication, file uploads, email flows, and production deployment across Vercel and Render.

Eagle International Group Website: [React](#) · [TypeScript](#) · [Vite](#) · [TanStack Query](#) · [Tailwind CSS](#)

- Six-page corporate site for an international trade company. Complete component architecture, custom hooks, and dark theme design system deployed to Vercel.

Pivot Grid — MT5 Trading Platform: [Automated Trading](#) · [Fibonacci Strategies](#) · [EURUSD](#) · [XAUUSD](#) · [BTCUSD](#)

- Automated MetaTrader 5 platform executing Fibonacci pullback strategies across three instruments. Custom UI with instrument badge system; managed privately for performance validation.

EDUCATION

Bachelor of Science (Animal and Environmental Biology)

University of Benin | 2019 – 2023 | Benin City, Nigeria

Full-Stack Web Development Programme

Pluracode Academy | 2025 – 2026 | Lagos, Nigeria

- Curriculum: HTML, CSS, JavaScript, Bootstrap, GitHub, React (JavaScript), Backend with Node.js & Express, Postman, MongoDB
